EFFECT: Removes the creation of a new school-grading program which had been replacing the labels of the existing accountability index already being implemented by the State Board of Education with a requirement that the State Board of Education and the Office of the Superintendent of Public Instruction work together to ensure that the accountability index categories for each school and district are displayed on OSPI's existing website report card for schools and districts, requires the SBE's accountability index website and the OSPI report card website are linked and requires that school districts include the accountability index information for each school and the district on the reports it makes available to parents. Language is included that requires explanations of how the accountability index is calculated and what it means is included on all websites as well.
